PROFESSIONAL SUMMARY

AI Engineer specializing in LLMs, NLP, and production AI systems, with hands-on experience in fine-tuning pretrained models, building RAG pipelines, and deploying scalable FastAPI-based inference services.

EXPERIENCE

AI Engineer

Ultra X BD

Aug 2025 – Present

- Built and deployed **production-grade AI systems** for computer vision, NLP, and LLM-based applications.
- Fine-tuned and adapted **pretrained language and deep learning models** for domain-specific tasks.
- Developed **FastAPI-based inference APIs** supporting NLP pipelines and LLM/RAG workflows.
- Implemented **advanced prompt engineering** to improve LLM accuracy and reliability.
- Integrated AI services with backend systems ensuring scalability and performance.

PROJECTS

Music Genre Classification Using Explainable ML

Research Publication | ITIKD 2025

- Built an end-to-end ML pipeline on **15k+ audio samples** with ensemble modeling.
- Achieved **93.42% accuracy** and **0.93 F1-score**.
- Applied **LIME** for explainability and model transparency. [Project link](#)

AI-Blockchain-Based Data Collection Platform with Automated Dataset

IoT, AI & Blockchain

- Integrated **LLM-based NLP pipelines** for semantic validation and data quality checks.
- Used **prompt-engineered workflows** to automate structured data extraction. [Project link](#)

COMPETITIVE PROGRAMMING

- ICPC Dhaka Preliminary participant (2022–2024).
- Ranked 146th (Dhaka Prelim 2024), 126th (ICPC Regional DIU 2024).
- Solved 1400+ problems across Codeforces, AtCoder, CodeChef.
